REPORT

The seminar was held on 28th February 2020 for 8th Semester Civil Engineering students. The Program began with an invocation song by a group of students. The welcome address was given by **Dr. Giri Prasad C**, Senior Assistant Professor, Department of Civil Engineering.

Dr.P S Niranjan, Professor, and Head spoke about the importance of the skillset requirements among civil engineers.

The Resource person was introduced to the participants by Mr. Surendra B V, Associate Professor of Civil Engineering Department.

Mr. Anand T the Resource person, deliberated the whole session with case studies and brain storming sessions involving the active participation of the students in many related hands on activities.

The Vote of thanks was delivered by **Dr. Vinay Kumar B M,** Associate Professor, Department of Civil Engineering.

The excerpt of his talk is as follows:

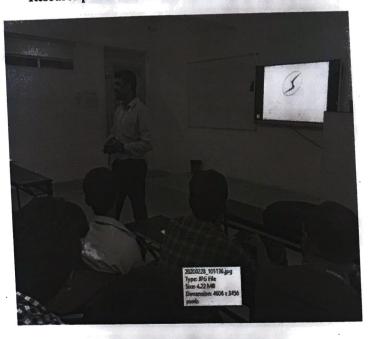

There are a number of different software packages used by architects. For rough schematic designs, many starts in a 3D modelling program like Sketchup (fairly simple and easy to use) or Rhinoceros (more complicated and extendable).

Architectural 2D drawings are usually produced in Autodesk Autocad, though there are some other programs out there. Many firms are now transitioning to BIM (building information modeling) software, which creates a 3D model of the building and holds a database of project information.

Traditional drawings can be made from this BIM model, and consultants and the builder can use it to coordinate construction. Autodesk Revit is the most used BIM software but there are other options like Vectorworks or Archicad.
