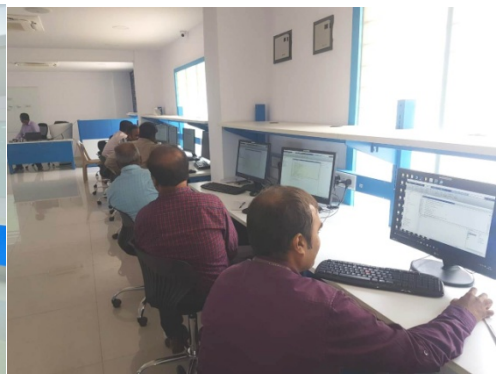
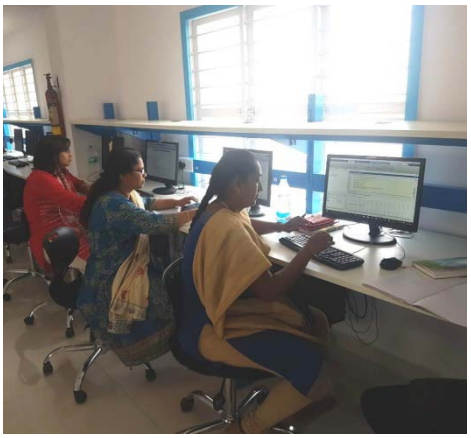
Topic: Advances in Neural Networking, Deep Learning and Machine Learning using MATLAB
Dates: 27th – 28th May 2019




A Two days workshop on "ADVANCES IN NEURAL NETWORKING, DEEP LEARNING AND MACHINE LEARNING USING MATLAB" organized by Department of Mechanical Engineering, in association with CoreEL Technologies was held from 27th – 28th May 2019 at Quest Global IIoT- Centre of Excellence Lab, NHCE. The main objective of this training program was to provide the PG students and Faculty members with opportunity to improve their programming skills using the MATLAB environment to implement algorithms and to use MATLAB as a tool in complex solutions to Solar Cell Modelling, Neural Networking, Deep Learning, Machine Learning and Control systems with hands on training sessions. The workshop was attended by participants from faculty members of various colleges and in house.
