looking forward for workshop on therapies and how can we implement it in our session

Looking forward to having more workshops which are focused on interventions which will help us in the sessions. In-depth workshop on CBT or any other therapy would be really helpful.

To a college a level workshop it was not relevant. These were the basic theoretical class what was thought for BSc and MSc. Organizing workshops more than on issues or problems what a counsellor face, it could be useful if we had a solution based workshop.

THANK YOU Ma'am

Would have been helpful if Ma'am could focus more on the session topics .
